EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Paul Stephens on 24 June 2004.

The application has been amended as follows:

Cancel claims 16, 17 and 36-46.

Allowable Subject Matter

2. Claims 1-12, 14, 15, 18-31, 33-35 and 47 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "incident light signal incident on the surface under total internal reflection is reflected into the non-guiding propagation region for propagation within a second plane forming an acute angle with the first plane, wherein the first plane and the second plane extend orthogonally to the surface" as set forth in the claimed combination. Claims 2-15 and 18-28 are also allowable based upon their dependence on claim 1.

Claim 29 and dependent claims 31 and 33-35 are allowable based upon the reasons given in the previous office action. Claim 47 is allowable over the prior art for the reasons given in the previous office action.

The prior art of record, Chen et al and Asakawa et al teach an integrated optical device comprising an optical substrate having a diffractive optical element having a plurality of spaced apart members such that light incident on the surface under total internal reflection is reflected into a non-guiding propagation region of the substrate. However, the prior art does not teach that the spaced apart members are externally mounted to the surface of the substrate or that incident light signal incident on the surface under total internal reflection is reflected into the non-guiding propagation region for propagation within a second plane forming an acute angle with the first plane, wherein the first plane and the second plane extend orthogonally to the surface and there is no motivation or teaching to modify this difference as derived.

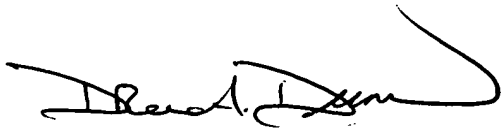

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alessandro V. Amari whose telephone number is (571) 272-2306. The examiner can normally be reached on Monday-Friday 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn can be reached on (571) 272-2312. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
